

Joker Bot

INTRODUCTION –

Joker Bot is a fun, sarcastic, and friendly chatbot designed to make users laugh instantly. Its main purpose is to deliver jokes in multiple popular formats while keeping responses short, engaging, and beginner-friendly. Joker Bot adds humor to conversations by combining wit, sarcasm, and relatable content.

The bot supports various joke categories such as One-Liners, Puns, Dad Jokes, Dark Humor, Sarcasm, Observational Humor, and Meme Humor. For each selected category,

Joker Bot provides multiple jokes to ensure continuous entertainment. What makes Joker Bot unique is its sarcastic fallback behavior—when users enter incorrect or unclear input, the bot responds playfully, guiding them to try again instead of showing boring error messages.

Overall, Joker Bot is built to improve user engagement, showcase prompt engineering skills, and demonstrate how personality-driven chatbots can make interactions more enjoyable and human-like.
