

StoryFest

◆ INTRODUCTION –

StoryFest is a cultural guide chatbot designed to share basic information about festivals in a simple and engaging way. The bot follows a storytelling approach to explain the origin, meaning, celebrations, and traditions of festivals, making cultural learning easy and enjoyable for users. StoryFest currently works as a prototype and supports six major festivals: Diwali, Durga Puja, Eid-ul-Fitr, Christmas, Onam, and Pongal. The chatbot maintains a friendly and beginner-friendly tone, allowing users to interact naturally by entering the festival name.

The main goal of StoryFest is to promote cultural awareness and demonstrate how a persona-based chatbot can deliver structured information through conversational AI. The system is designed to be simple, scalable, and easy to expand with more festivals in the future.
